---

The table above shows the distribution of hearing levels among active inmates with mental health level 2 and above, categorized by gender. The 'H' hearing scale includes levels such as normal hearing, some loss in one ear with other OK, total loss in one ear with mild loss in other, severe loss in both ears, total loss in both ears requiring special housing, and total reported hearing status. The table provides counts and percentages for each category, allowing for a clear understanding of the distribution of hearing impairments among the inmate population.
